Why is it important to use Social Media? Social media is used to make social interactions making use of various techniques. Social media is used to share knowledge and information with various people on internet. Social media is the modernized way to reach ultimate consumers with the help of internet. Various companies are now making use of social media to advertise their brands and increase their reputation. Social media is continuously increasing the ability for business to reach customers. Social media has been brought out as a new tool for social marketing and sales.

With the help of social media, you can add social bookmark that allows you to link your most important webpage in order to improve sharing. Social media is used to develop various techniques that help you to make your business relations more strong.

- With the help of social media, companies can make effective participation in existing social media networks and creates good relation on their turf. Social media produces number of sites for your social development. Sites such as twitter, facebook, myspace etc. have helped you to increase your socialization by making it possible for you to reach your friends, relatives, costumers, business delegates etc in few seconds.

- With social media, your customers and prospects can simply connect with you via different

networks. You can explore your ideas and create your own blogs to enhance yourself in business market.

Social media tools help you to learn new technologies that empower your business collaboration. Social media is useful and important in process of promoting your site or business channels through social media marketing. This marketing helps you to develop massive traffic for your link. Other than social media, there is no other way of creating large amount of customers for your website. Social media marketing helps you to develop profitable sites over time.

Persons who do not make use of social media in today's developing era are categorized in three categories:

Either the person may be not aware of social media

- Or he may be the one who is aware of it, but is unknown of how to make use of it
- Or he may be the one who don't believe in the efficiency of social media

There are various reasons for why should we make use of social media. One of the reasons is that it is natural in nature. This helps you to expose your website to large number of people in a spontaneous fashion. This helps you to increase your social media traffic as well as search engine traffic with the help of strategic marketing. Social media often exceed benefits over cost.

Social media has the ability to provide you with many links, which may otherwise cost you in dollars for their purchase. Social media optimization along with marketing is specific to community only. Social media sites are given with better search ranking that greatly increase the potential of your site's income. Social media puts your site as center of your marketing strategy by optimizing your site or content and making it a marketing magnet.
